Our Toddler House offers specialized care to toddlers in crisis. We care for children in need between ages 2-6 years old. ABBA House cares for a maximum of 14 children at any given stage and more than 400 children have moved through our house since its opening in 2000. This is a temporary place of safety where children are

received and are evaluated for a period of 6 months until a more permanent placement can be found through family placements, foster care or adoption. Our hearts are still fixed on our original focus to trust God for a forever family for every baby or child in our care. All our children are loved and receive the best emotional,

physical and spiritual care through our specially formulated programs geared at brain development and overall optimal development.
